JOB DESCRIPTION

Are you curious, do you like getting to the bottom of complex problems, are you open to work in a fast pace, ever changing environment? If so, this is an opportunity you'll want to know more about.

In today's complex business environment, an organization's adaptability, agility, and ability to manage constant change through innovation can be keys to success. We are looking for a talented analyst to join us team who loves working with data - parsing, analyzing, investigating, interpreting, modeling, and extracting knowledge from large volumes of data to drive informed decision-making across the company.

Key Responsibilities

Requirements Organizations

- Helping businesses implement technology solutions in a cost-effective way by determining the requirements of a project or program, and communicating them clearly to stakeholders, facilitators and partners.
- Planning and monitoring
- Translating and simplifying requirements
- Requirements management and communication
- Requirements analysis

Deal Flow Generation

- Implement advanced strategies for gathering, reviewing and analyzing data requirements
- Focus on bringing high quality start-ups to the network for investments In-depth research to track industry trends and newer investment segments on a global & local scale
- Prioritize requirements and create conceptual prototypes and mock-ups
- Support internal innovation processes and incorporating learnings
- Create and build feedback loops to ensure a model of continuous improvement and value for both Investors and MA.

Skills and Aptitude

- Ability to operate in an unstructured environment
- Experience in negotiating investments, valuations and investment terms
- Strong understanding of term sheets and shareholder agreements and deal closure process
- Entrepreneurial aptitude – with high ability to multi-task across assignments
- The ability to conduct cost/benefit analysis
- Written and verbal communication, including technical writing skills

Education and Experience

- Degree in finance or business management
- Experience: Approximately 1-2 Years
